

Orange County Department of Education Professional Development 2009-2010

To support a strong implementation of the MIND Research Institute's materials and to strengthen the mathematics program for participating schools, **OCDE** is offering an additional package of professional development.

Teachers and coaches of mathematics will participate in three days of professional development and two group coaching sessions at the school site.

Professional development will include:

- Instructional practices for integrating ST Math with your grade level curriculum
- Strategies and protocols for working as a professional learning community
- Instructional pedagogy for increasing student conceptual knowledge
- Increase of mathematical content knowledge
- Alignment and coherence with state adopted materials

The principal will also receive support for math leadership training.

This training is created only for schools participating in the Orange County Math Initiative and participating schools will be part of the proposed research study.
